

C. Reed Steck

Full Stack Developer - Typescript / React / AWS / Azure
steckreed@gmail.com | 740-601-4242 | full-steck-development.com

Professional Summary

Full Stack Developer with over 6 years building and shipping scalable cloud applications across AWS and Azure. Currently delivering end-to-end features on a regulated commercial insurance platform within a 10+ developer team. Previously built and led a programming and automation team from the ground up, helping scale a startup from 7 to 24 employees.

Skills

Languages: TypeScript, JavaScript, Python, PHP, SQL (T-SQL), HTML, CSS/SCSS, Shell
Frameworks: Next.js, React, Node.js, Express, MUI, Tailwind, Zod, TanStack Query, Kysely
Cloud/Infra: AWS (Lambda, Aurora, DynamoDB, Cognito, S3, SST/IaC), Azure (Functions, Logic Apps), Docker, Firebase

Education

The University of Akron, Akron, OH

B.S. in Computer Information Systems: Software Development

Expected May 2027

A.A.B in Computer Information Systems: Programming

Graduated Dec. 2021

A.A.B in Computer Information Systems: Web Development

Graduated Dec. 2021

Work Experience

Full Stack Developer (Contract)

Dec. 2024 – Present

Noodle Group (client: a Commercial P&C Insurance Provider) - Remote

TypeScript | React/Next.js | AWS Serverless | PostgreSQL

- Ship end-to-end features (React UI, Lambda API, Postgres migration) in a 10-package serverless monorepo alongside a 10+ developer team, powering a commercial P&C policy administration platform which spans quoting, rating, binding, endorsements, billing, and regulatory reporting.
- Own the premium-finance billing integration across policy issuance, endorsements, cancellations, reinstatements, and delegated-payer flows, including a pre-issuance validation that informs staff of errors before failing downstream at the vendor API.
- Implemented multi-state commercial property rating schemas and domain tables across 10+ jurisdictions and counting, helping drive a conditional quote and policy UI from a shared schema package.
- Rebuilt cross-subdomain authentication and multi-stage environment routing on AWS Cognito.

Director of Programming and Automation

Feb. 2020 – June

2024

FortisureIT - Akron, Ohio

- Built and led an 8 developer programming and automation team from the ground up, maintaining 9 projects across 5 clients.
- Built and published dynamic web-based advertisements for companies including Nestle and Dick's Sporting Goods, tailoring ad experiences in real-time from user preferences and live weather conditions.
- Developed a fully automated ETL data parsing system for DuPuis, utilizing Azure Logic Apps to extract document data within specified in-bound emails, transforming it into human-readable spreadsheets, and loading it into a secured file system for distributor access.
- Developed a cloud-based customizable Monday.com dashboard clone to assist employees in visualizing company data in real-time to analyze cost saving methods and boost productivity from data visibility
- Owned the architecture, sprint planning, and code reviews across the team's portfolio, and hired local web developers through resume screening and technical interviews

Civil Engineering Intern, E.L. Robinson, Columbus, Ohio

May 2018 – Jan.

2020

- Assisted in finalizing design drawings for roadway projects and ditch calculations
- Received training in AutoCAD, Microstation, and developing Excel macros
